EDUCATION

Vidya Vihar Institute of Technology (Bihar Engineering University)

Bachelor of Technology (B.Tech) in Computer Science & Engineering (CSE)

Bihar, India

Expected Graduation: 2028

SKILLS SUMMARY

Languages: Python, JavaScript, HTML5, CSS3, SQL

Frameworks & Libraries: React, Django REST Framework (DRF), Django, Tailwind CSS

Databases & Hosting: PostgreSQL, SQLite, Firebase, Git/GitHub, Vercel, Netlify, Render

KEY PROJECTS

PrepWise | React, Tailwind CSS

- Architected an AI-driven interview orchestration portal for full-stack developers utilizing React and OpenAI API.
- Designed a specialized 'STAR Method' behavioral parsing engine and low-latency code laboratory with dynamic syntax-themed output modelling.
- Created rich micro-interactions and spring physics transitions with Framer Motion to elevate user onboarding flows.

TechlancePrep | Python, Django, Tailwind CSS, PostgreSQL

- Built a collaborative hub for engineering system design and DSA preparation.
- Implemented secure JWT authentication profile layers, identity vault, and a full CRUD administration management system.
- Designed relational database tables in PostgreSQL, optimizing query response rates for high-frequency telemetry endpoints.

EduMarks | Python, Django, ReportLab, Tailwind CSS

- Developed a student marksheet registry with institutional report verification workflows.
- Programmed a dynamic PDF generation engine using ReportLab, automating layout compiling, margins, and rendering speeds.
- Created an SEO-optimized institutional web portal with secure grades database tables.

EXPERIENCE

Codec Technologies | Python Developer Intern

Remote | Dec 2025 - Jan 2026

- Optimized backend database schemas and queries, leading to a noticeable increase in data loading efficiency.
- Engineered modular Django database structures and REST APIs to enable clean front-end client integration.
- Collaborated with project managers to debug existing python scripts, improving core application runtime stability.

Comestro Techlabs | Web Development Intern

Offline | Dec 2025 - Jan 2026

- Built and optimized responsive web pages using HTML5, CSS3, and JavaScript, resolving visual alignment bugs.
- Implemented high-fidelity mockups using Tailwind CSS, ensuring 100% mobile-friendly viewport scaling.
- Streamlined code structure by modularizing scripts, reducing page bundle sizes.
